

# Climate Champions: Impacts of Climate Change in TAS

---

## Tasmania

- Tasmania could experience sea level rises and greater storm surges
- Up to 15,000 of Tasmania's residential homes are at risk of flooding from a sea level rise of 1.1 metres.
- A 1.1 metre sea level rise will put up to 2000 kilometres of Tasmania's roads, up to 160 kilometres of Tasmania railways and up to 300 commercial buildings at risk
- Agriculture, a major part of Tasmania's economy, is vulnerable to climate change - especially dairy farming
- Tasmania's salmon and rock lobster finishing industries are vulnerable to climate change.
